SUMMARY

Python developer with hands-on experience building scalable REST APIs using Django and FastAPI, and production-level AI systems leveraging LangChain and Retrieval-Augmented Generation (RAG). Proven ability to deliver end-to-end solutions — from database architecture and backend logic to LLM integration and containerized deployment. Focused on writing clean, maintainable code that solves real business problems.

TECHNICAL SKILLS

Languages & Frameworks	Python, Django, Django REST Framework, FastAPI, LangChain, LangGraph, RAG Systems, Flask
AI & ML	SentenceTransformers, Scikit-learn, Pandas, NumPy, Matplotlib, Groq & OpenAI LLM API
Databases	MySQL, PostgreSQL, ChromaDB (Vector DB), MongoDB, Redis
Tools	Git, GitHub, Docker, Celery, Postman, Streamlit, Cache
Frontend	HTML5, CSS3, Tailwind CSS, JavaScript, React, Vite

EXPERIENCE

AI/ML Intern Word Wise Solutions

Feb 2025 – Present | Remote

- Designed and deployed RAG pipelines using LangChain and ChromaDB, cutting document retrieval time by 70%.
- Integrated Groq LLM API into AI-powered applications, reaching 92% accuracy on domain-specific query benchmarks.
- Applied anomaly detection and classification techniques using Scikit-learn and Pandas across 5 production-style datasets.

Python Backend Intern CodeCelix

Sep 2025 – Nov 2025 | Remote

- Delivered 8 RESTful API endpoints using Django REST Framework, integrated directly with a React frontend.
- Reduced frontend-backend integration turnaround by 35% through structured API contracts and clear documentation.
- Coordinated task allocation and code reviews across a 3-member backend team throughout the project lifecycle.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

University of Punjab, Lahore | Expected 2029

PROJECTS

Medical RAG Chatbot — MediCare AI Solutions (2026)

- Engineered a RAG pipeline over an 8-document medical PDF knowledge base using LangChain, ChromaDB, and Groq LLM (LLaMA 3.3 70B).
- Reached 94% semantic retrieval accuracy via SentenceTransformers cosine similarity; average response time under 2 seconds.
- Containerized and shipped as a Dockerized Streamlit application with anti-hallucination prompt guards.

BizLedger — Multi-Tenant SaaS Accounting Platform (2025)

- Built a full-stack multi-tenant SaaS platform using Django REST Framework, JWT auth, and React/Vite with role-based access (Owner, Accountant, Viewer).
- Engineered 7 Django apps covering invoicing with auto-calculated totals, expense tracking with categories, and a real-time financial dashboard.
- Designed tenant-isolated PostgreSQL schema ensuring complete data separation across business accounts; containerized with Docker.

Freelance Client Projects (2025–2026)

- BAWA G Restaurant:**
Delivered a full Django-based website with menu showcase, online order inquiry form, and a branded dark/gold design system for the restaurant's digital presence.
- TRT Construction:**
Developed a React and Vite corporate website with a masonry gallery, WhatsApp inquiry form, and a branded industrial design system.
